

QUALITY, ENVIRONMENT, HEALTH, HYGIENE AND SAFETY POLICY

TIV VALVES Srl has identified in the full satisfaction of customers, and employees, and in the continuous improvement of safety and environmental performance the priority objectives of its Quality, Environment, Health, Hygiene and Safety Policy, according to standards:

- UNI EN ISO 9001:2015
- UNI EN ISO 14001:2015
- UNI ISO 45001:2023
- DIRECTIVE 2014/68/EU PED
- API Q1 10th Edition

Management considers that the Quality of the supplied product, made through a constant commitment in every company process, is the key to achieve a leadership position in the market.

TIV VALVES is always committed to:

- contribute to building a better present and future for current and future generations by valuing resources.
- develop knowledge to play a leading role in creating a sustainable future, responding to customers' needs with an innovative value proposition.

TIV VALVES makes available to its own organization adequate facilities and proper training to the human resources.

The final target is to provide, valves with high technological valves for the Energy Market, in compliance with the safety requirements established by the directive 2014/68 EU PED, and by the applicable international product standards (API 6A, API 6D, API 6DSS).

For this purpose, TIV VALVES considers as fundamental the collaboration with our suppliers, as our indispensable partner.

To reach these targets, TIV VALVES has developed an Integrated Management System Quality, Environment, Health and Safety).

As a base for the Integrated System, the Company Management is committed to:

- analyze the conditions of hygiene and safety in the workplace, and propose, through the correct application of the Standards and the provisions of this Management System, to prevent injuries, occupational diseases, emergency situations and fires;
- involve, raise awareness and train internal resources, to know of the effects of their own behavior with respect to Environment, Health, Hygiene and Safety issues;
- be a Customer centric company and reach the maximum Satisfaction;
- respect of Product conformity to Customer requirements and applicable standards;
- maximum on time delivery of product;
- pursue the continuous improvement of the performances and the effectiveness of the Quality Environment, Health, Hygiene and Safety Management System;
- operate in full compliance with applicable legal and normative requirements, and any other requirement which the company claims compliance to.
